A MASTER OF ITS CRAFT.
CUTTERS AND SPECIALITY KNIVES FROM MARTOR.

Quality made in Solingen.

MARTOR KG from Solingen in Germany is the leading international manufacturer of high-quality cutting solutions. Our GS-certified safety knives have been setting benchmarks for decades, and we have always set the same quality standards for our range of special knives presented in this catalogue.

Meeting your needs.

Our speciality knives give you highly developed cutting tools for a broad range of trades and applications. For cutting out, cutting off and cutting up as well as for handicrafts, designing, scraping or deburring – you will always get the result you need.

MARTOR-DNA in every tool.

Our speciality knives, like our safety knives, are a culmination of more than 75 years of experience in knives and blades where no compromise is made on sharpness, reliability and durability, and where only the best plastic and metal materials are used. Furthermore, we know exactly the procedures and principles by which our customers work and are therefore able to provide cutting tools that are, so to speak, tailor-made for the task. This is what makes MARTOR products different.

FOR SPECIAL TASKS YOU NEED
SPECIAL SOLUTIONS.

More than 18 speciality knives in a multitude of versions.

Manual cutting tasks are required in virtually every work and home situation. To meet your needs, MARTOR has more than 18 different speciality knives, with a large range of blades for different uses as well as practical accessories such as the new cutting mats.

One name for each product family.

To help you find what you need, each product family has its own “first name”. For example, if you come across a product beginning with **ARGENTAX**, you will know that it belongs to the family of standard cutters for universal applications. The **GRAFIX** family covers all scalpel-type cutting tools. MARTOR’s professional scrapers begin with the name **SCRAPEX**, and deburrers with **TRIMMEX**.

Good advice.

Our system of names is just one way of finding what you need. But our mission is to provide you with the MARTOR product that specifically matches your cutting requirements. This is the difference between having a sharp knife and having a knife that is optimal for your cutting needs. Therefore, don’t hesitate in contacting us. We can personally advise you on the product for your needs – by telephone, email or we’ll arrange to visit you.

Our ARGENTAX family contains above all those cutting tools that you know as cutters: universal knives for the most varied of cutting applications and materials with a handle made of plastic or metal. In addition to this we have a wide range of snap-off and non-segmented blades. You can almost always regulate the cutting depth and the blade retraction manually.

ARGENTAX

ARGENTAX TAP-O-MATIC

NO. 331.02

Tough when using. Flexible to handle. With styropor blade.

A cutter for high demands? The ARGENTAX TAP-O-MATIC with an 18 mm wide polystyrene blade fulfils this wish. A blade extension of up to 83 mm makes the knife ideal not just for extra deep cutting tasks. The blade lock is also so robust that it can resist cutting pressures of up to 18 kg. And you can also adjust the blade extension to several different levels.

A robust tool
In the ARGENTAX TAP-O-MATIC, the handle and metal rail to guide the blade form a very stable unit. You can really feel it when you take it in your hand. And all the more when you start cutting.

Large selection
Among 15 possible cutting depths, there must be a suitable one for you. The not segmented polystyrene blade, safe from breaking off, is particularly suitable for work with a maximum blade extension.

Running to a narrow point
The handle of the ARGENTAX TAP-O-MATIC tapers off to the front. So you can approach the cut in more narrow areas too.

The handle? Handy
The ARGENTAX TAP-O-MATIC fits exactly into your hand. What's more: the grooves on the back increase the gripping capacity. So there is no risk of your hand slipping while cutting.

Practical eyelet
You don't have to do without the eyelet in the ARGENTAX TAP-O-MATIC. You can just pull a strap through it and attach the cutter wherever you need it.

ARGENTAX CUTTEX 9 MM
NO. 46102.08

Classic cutter. With a 9 mm polystyrene blade.
Sharp, small, handy – the ARGENTAX CUTTEX 9 MM with a narrow polystyrene blade has all the possible properties you would expect from a cutter. Ideal for easy cutting of cardboard boxes, cardboard, paper and adhesive tape. You can grip the long, rounded off handle comfortably and vary the blade extension as you wish. And what if the bendable blade gets blunt? Change is without problems.

Small, light, handy
The list could be continued endlessly. That's why the long plastic handle is rounded off at many points to make handling it even more pleasant and comfortable for you.

Easy blade changing
Your own two hands are enough to assist you. Just pull off the cap at the end of the handle, press the slider downwards and finally towards the back and out of the handle. Remove the blade. Done.

Adjusts well
Cardboard box, cardboard, paper? It's all the same. You can flexibly adapt your cutter to the respective conditions with the adjustable blade extension.

Full cutting depth
You are on the safe side with your polystyrene blade even at a maximum blade extension. Because it is extremely bendable and can therefore carry the load of even a high degree of stress.

Practical pocket clip
It's good to have a useful helper such as the ARGENTAX CUTTEX 9 MM at hand, fast. You can attach it to your shirt or trouser pocket with the pocket clip and then you just have to reach out.

ARGENTAX CUTTEX 18 MM

NO. 46202.08

Classic cutter. With an 18 mm polystyrene blade.

If you are looking for a mature cutter with a variable blade extension, the ARGENTAX CUTTEX 18 MM with a wide polystyrene blade is a very good choice. Just like its narrow “brother”, the ARGENTAX CUTTEX 9 MM, it fits very well into your hand. But it is not just useful for cutting cardboard boxes, cardboard and paper, but also adhesive and other types of tape. You can easily change the bendable blade.

90% of original size

Light and handy
The long plastic handle lies very comfortably in your hand. It is also rounded off at many points to make handling even more pleasant and comfortable for you.

Easy blade changing
Your own two hands are enough to assist you. Just pull off the cap at the end of the handle, press the slider downwards and finally towards the back and out of the handle. Remove the blade. Done.

Adjusts well

ARGENTAX MULTIPOS
NO. 00915210.02

An energy package for any kind of job. With a trapezoid blade.

There are a couple of substantial reasons that favour the ARGENTAX MULTIPOS – in the true sense of the word. The fully revised cutter is made entirely out of zinc. An improved ergonomic design goes hand in hand with the familiar high degree of versatility and robustness. So you can work with the ARGENTAX MULTIPOS on various cutting materials. The blade extension can also be adjusted to several levels. As an “emergency reserve” there are five spare blades in the handle.

Stable Design
As you can see and feel, the ARGENTAX MULTIPOS is extremely stable. And flexible, since you can use a large number of blade shapes. The product is therefore suitable for many cutting applications.

Made of full metal
The ARGENTAX MULTIPOS is a tool that seems to be made of one casting. Zinc die casting, to be precise. The end of the ergonomically designed handle forms an eyelet for fastening.

For right and left handers
As you can see, the slider is on top of the handle, and can therefore be operated in the same way for the left and the right thumb. The ergonomically shaped handle also fits into any hand.

2-cutting edge blade
Before changing the quality blade, you can turn it over once. That doubles the usage time of the blade and reduces the energy you spend. Because your product cuts like new again.

It's all in the handle.
You will find no less than five spare blades in the handle of the ARGENTAX MULTIPOS. With this stock of trapezoid blades, nothing stands in the way of a consistently high cutting performance.

ARGENTAX FILIUS
NO. 19152.02

Big in matters of versatility. With a trapezoid blade.

The ARGENTAX FILIUS is a small cutter with manual blade retraction that can be used in a variety of ways. It has a preference for cardboard and film. You can push the blade outwards in three different cutting depths through the adjustable slider. Or back into the handle to hide it safely. You can choose between several blade variants, from stainless to rounded.

Easy blade changing
The ARGENTAX FILIUS has been designed so that changing blades is effortless. Just press the slider downwards and guide it at the back out of the handle. And the blade is ready to use.

2-cutting edge blade
Before you have to change the quality blade, you can turn it over once. This will double the usage time of the blade – and reduce the energy you spend. Because your product will cut like new again.

Small, light, handy
These are all properties that will assist you in working without fatigue. In addition, there is another useful detail: the grooves at the front of the handle. So that you don't lose your grip.

ARGENTAX TEXTI

NO. 79000.05

Hardly bigger than the blade itself.

Even if it looks like it, the disposable cutter, the ARGENTAX TEXTI is not meant for shaving. What you get, rather, is a small separating cutter you can use for very different purposes. Place your fingers on the blade holder when cutting! You can fold the blade back into the handle after use to “de-sharpen” your cutting tool.

No blade change
ARGENTAX TEXTI is a disposable cutter. You can't change the blade, so you won't lose it while working either.

With safety
If you store the ARGENTAX TEXTI blade in the handle, your cutting tool is safe. Because the blade holder will also remain there until you push it out again.

Small, light, handy
So much so, that the ARGENTAX TEXTI doesn't even carry any weight. So working with it is particularly easy on your hands.

ARGENTAX RAPID
NO. 594.03

Two blades, one goal: silicon.
The ARGENTAX RAPID has found its purpose: silicon cart-ridges. It has two blades to deal with them. One small pointed one, that you can use to scratch and cut open the plug. And a rectangular one which caps the spout opening like a guillo-tine according to the thickness you require. Nothing can then come in the way of your actual work, such as renewing joints.

Two functions
Ever had problems with a silicon cartridge? First of all, with the closed plug? And right after that, the spout opening, that is too nar-row? The ARGENTAX RAPID can provide first class cutting in both cases.

For left and right handers
It makes no difference whether you are left or right handed when using the ARGENTAX RAPID. You will always work with the same precision. Any hand can take care of the ARGENTAX RAPID.

Practical eyelet
You won't have to do without it in this special cutting tool: the practical eyelet for attaching. So you can hang up the ARGENTAX RAPID safely, and always find it again.

Safe when you are on the go
The cutter has a protective cap to ensure that personal transporting is safe. It covers the pointed blade. The sharp edges of the sec-ond blade are best stored in the handle.

ARGENTAX MITRE CUTTER

NO. 57542.02

Chamfer on insulation boards? No problem.
Unusual name, unusual tool. Using the ARGENTAX MITRE CUTTER you can prepare insulation boards at thicknesses of up to 15 mm. Specifically, you cut at a 45 degree mitre using the two slanted blades. You can then join the two boards to fit exactly. Cutting tasks are made easier through an ergonomically designed handle and the smooth, slideable underside. In addition, the handle holds five spare blades.

45 degree cutting angle
Whether at home or at work: as a craftsman, any relief in your work is welcome. That's why the cutting angle of the two trapezium blades has been precisely adjusted. The smooth bottom surface also slides easily over the material.

2-cutting edge blade
Before changing the quality blade, you can turn it around once. That doubles the usage time of the blades and reduces the energy you spend. Because your product will cut like new again.

For those who like to be accurate to the millimetre: with our GRAFIX tools you can cut reliably and with the highest precision, whether you're at work or at home, a graphic designer or an architect, a handicraft enthusiast or a model builder. The cutting performance of our scalpels ranges from fine paper through to thin cardboard and smooth films on to fabrics and textiles.

GRAFIX

GRAFIX BOY
NO. 31172.00

If you are particular about details. With a prominent tip.
GRAFIX BOY is something of a “fine fellow” among scalpels. That’s because it is suitable for particularly precise and delicate cutting work. Or for careful erasing. You hold the cutting tool made of aluminium in your hand as you would hold a writing instrument. It is also very uncomplicated to handle, for example, blade changing.

Made of aluminium
The heading already says everything. The GRAFIX BOY is an extremely robust cutting tool. Whether as a handyman, artist or graphic designer – you will definitely count the scalpel as one of your assistants for a long time.

Easy blade changing
Changing blades is so easy, that you only need to remember the following: turn open the knurled nut and release the blade holder. Take out the blade, put in the new one, done.

Light and handy
GRAFIX BOY convinces you with its light and handy appearance. The pen-type handle ends in a knurled nut which prevents your fingers from slipping.

GRAFIX 501
NO. 501.00

The artist among scalpels.

Are you from an industry where the details matter? The GRAFIX 501 is made for all fine cutting work – as well as for erasing. Advertising agencies and technical offices therefore reach out for the GRAFIX 501. It's also because the exceptionally large variety of blades will encourage your creativity.

Robust Design
The handle and knurled nut are made completely out of aluminium. For you, this means that you can definitely count the GRAFIX 501 as your companion for a long time.

Easy blade changing
And how easy it is: You turn open the knurled nut and you can then take out the old blade. The choice of new blade is more difficult as there is a wide range of alternatives.

Easy and handy
The GRAFIX 501 not only looks like a pen it also feels like one in your hand. The grooves on the knurled nut contribute to this feeling. An open view on to the point of cutting in is also an advantage.

A wide range of blades
0.50 or 2.50mm thick, needle type or rounded, single and double edge grounded? As you can see, there are no limits to the imagination as far as blade varieties are concerned.

GRAFIX PICCOLO
NO. 32132.00

Cut, deburr – and convince!

Whether in the office or in your free time, whether for graphic designers, handymen or model builders, the GRAFIX PICCOLO provides valuable services everywhere. You can use this aluminium tool just as well for cutting and deburring. The handy grip and the available blades are retractable. For your safety.

Robust Design
You can already feel the resistance of the GRAFIX PICCOLO the first time you use it. The aluminium handle and the stable design deserve the rating “exceptionally durable.”

Easy and handy
The GRAFIX PICCOLO is as light and handy as the name promises. It also has slightly raised grooves in the front area of the handle. One benefit for you is: an even better grip.

2-cutting edge blade
The mounted blade of the TRIMMEX PICCOLO is very versatile. On one side it is completely slanted, on the other it runs in a pointed tip to the middle. Choose for yourself!

Clip for attaching.
The TRIMMEX PICCOLO doesn't just look like a writing tool. It also has a clip at the end of its handle with which you can attach your cutting tool to your inside or outside pocket.

Retractable blade
You just have to turn open the handle and hold the tip upwards and the blade will slip into the handle. Don't forget to screw it shut again! Only the V-shaped polished blade is unsuitable for it.

GRAFIX SCALPEL SMALL

NO. 23111.54

The kind of scalpel one wishes for. With a prominent point.
A picture book scalpel in form and function – or just one from the MARTOR range of products. You can work on graphic paper, film sheets and much more with the GRAFIX SCALPEL SMALL. Since it is made out of chrome plated steel, you can easily place more stress on it. In this variant we have fitted a small scalpel blade with a prominent point.

Stable Design
No wonder, since your precise cutting tool is made 100% out of forged and chrome plated steel. This robustness will definitely benefit you in your daily work.

A wide variety of blades
You will definitely also like the large selection of blades provided for this scalpel. So you can re-equip your product depending on preference and cutting material with a few hand grips.

Tool-less blade change
You can lift the blade a little at the back with one hand. At the same time, you pull it out at the front with the other hand. Now insert the new blade, ready.

Ergonomic handle
In spite of the material, your scalpel is lightweight. The rounded-off handle end and the grooved surfaces for a firmer grip are pleasant additions. The open view of the cutting point also assists you in your work.

Labels and stickers, paint and varnish residue, glues and mortar all get where they don't belong, for example on the floor, the wall or a work surface. This is no problem when you go to work on them with a professional scraper. With SCRAPEX tools by MARTOR you can clean all smooth surfaces carefully without leaving a trace.

SCRAPEX

SCRAPEX ARGENTAX
NO. 46144.02

Top forming, top form.

It really feels good, the large, rounded handle of the SCRAPEX ARGENTAX. But even the performance of this classic scraper convinces. So you can free all smooth surfaces from residue and remains with it – no matter whether at work or at home. When you're done, push the protective cap over the blade, and everything is safe.

85% of original size

Especially ergonomic
Ergonomics is not the exception with us, but the rule. Even a scraper like the SCRAPEX ARGENTAX waits for you with a rounded handle, which you would gladly also hold for longer in your hand.

Large blade extension
There is comparatively a lot of blade available for a scraper. The advantage: You can reach between the surface and remains of the glue much more easily and can then remove it much more easily too.

Flexible to use
The SCRAPEX ARGENTAX is very suitable for flat scraping angles. So you can depend on your scraper even in difficult situations.

For right and left
The SCRAPEX ARGENTAX fits into every hand. No matter whether it's your right or your left hand. Because the handle has been shaped in such a balanced way, that no type of handling is preferred or neglected.

Easy blade changing
And that completely without a tool: you just have to push the blade to the side and take it out.

SCRAPEX 596

NO. 596.03

Nothing stays behind except satisfaction.

The SCRAPEX 596 is the largest scraper in our product range together with the even longer SCRAPEX 5196. Use it for effort-less removal of stickers, labels and other paper, colour and paint residue on all smooth surfaces. You can work especially effectively with the 100mm long blade. Your professional tool also convinces with a non-slip handle and the built-in safeguard.

70% of original size

Robust and durable

The 11 cm long handle is made of die-cast zinc. What does that mean to you? Definitely a scraper with a long life, also armed for the hardest of jobs.

Broad user surface

Considering it has a blade length of 100mm, you are already working on a large area of use. So you clearly don't have to use your scraper very often to clean a certain surface.

Safeguard included

To cover the wide blade, release the special screw manually and push the blade cover to the front with your thumb. Now turn the screw on again to shut it and everything is safe.

Non-slip handle

A tool of such dimensions should not slip in your hands. Of course, we have thought of that – and have therefore equipped the handle with a non-slip soft grip and small pores that are friendly to the hands.

Easy blade changing

The special screw will also help you change blades. Turn it open and remove the blade cover. Now you can take out and change the blade.

SCRAPEX CLEANY
NO. 544.00

What it does? Clean work.

Labels on the floor? Remains of materials tightly stuck? You can easily clean all smooth surfaces with the SCRAPEX CLEANY. The handy scraper is made of plastic. You can push its blade out of the handle with the practical slider, and after use, push it back in again to store it safely. Blade changing is also as easy as pie.

Good handling
The end of the handle is rounded so that it doesn't press into your hand. The grooves on the slide and in the front handle area also make your work easier. And the integrated blade magazine is comfortable too.

Transport safely
You don't just release the blade with the slide but also pull it back into the handle. It remains tight and safe there – so that you can transport your cutting tool without any problems.

Easy blade changing
Changing blades is possible without tools. You press the slider as far as possible to the front with your hand and release the blade in this way. Now you can push it out to the side.

Practical eyelet
You do not have to do without the eyelet with the SCRAPEX CLEANY. You can just pull a strap through it and hang up the scraper wherever you need it.

For right and left
The SCRAPEX CLEANY fits into every hand, no matter whether it's your right or left hand. Because the handle has been shaped in such a balanced way that no type of handling is preferred or neglected.

The final touch for your tool? Use our high quality deburring tools. You can use the TRIMMEX family by MARTOR to deburr soft and hard materials, on internal and external edges, on curved and straight surfaces. Our wide selection of matching handles and blades work to create a clean result.

TRIMMEX

TRIMMEX CUTTOGRAF

NO. 69606.00

Discover its talents. With a rounded-off blade.

A cutting tool that offers you a whole lot of possibilities? MARTOR has plenty of those. Like the TRIMMEX CUTTOGRAF with which you can cut and deburr effortlessly. We have fitted a blade with a rounded-off point in this variant which we recommend for both types of work. You can adjust the blade extension individually according to the material and the use.

Easy blade changing

One could also describe it as intuitive. You can push the blade holder right to the front to remove the blade. Put the new one in, replace the holder, ready.

A wide variety of blades

Count for yourself. There is definitely the right one for you among this unusually large selection of blades. Meaningful and safe: many of the blades can be lowered into the handle.

Easy and handy

Working comfortably also always depends on the handiness of the tool. That's why the handle of the TRIMMEX CUTTOGRAF is ergonomically shaped. The grooves on the top and at the bottom give you an even better grip when cutting.

Flexible blade extension

You can decide for yourself, how far the blade should protrude out of the holder. So you can finely adjust the cutting tool time and again after each use.

Practical eyelet

You do not have to do without an eyelet in the TRIMMEX CUTTOGRAF. You can just pull a strap through it and hang the cutting tool up wherever you need it.

TRIMMEX SIMPLASTO

NO. 514.00

Metal on the inside, plastic on the outside, round at the front.
The TRIMMEX SIMPLASTO is covered with non-slip plastic. It is best used for fine and precise cutting work with paper and cardboard. Or you can deburr different types of plastic parts with it. You can safely shield the pointed blade with the plastic cap included.

Particularly robust
And not without a reason: the handle is made completely of aluminium on the inside, the blade itself has been attached with two metal screws. So you can rely on the stability.

Particularly slip resistant
Because the aluminium core is surrounded by plastic, it increases the slip-resistance of your cutting tool. So you can even hold the TRIMMEX SIMPLASTO firmly with sweaty hands.

Practical eyelet
You don't have to do without an eyelet in the TRIMMEX SIMPLASTO. You can just pull a strap through it and hang up the cutter wherever you need it.

TRIMMEX CERACUT

NO. 170170.00

Ceramic for deburring. With a straight blade.

Why are ceramic blades ideal for deburring plastics and metals? Because they are very resistant und durable due to their enormous hardness. That's why the TRIMMEX CERACUT can smooth edges and remove sprayed points and separation lines from mould halves. Furthermore, the characteristic grinding of the MARTOR ceramic blade minimizes your personal risk of injury.

Straight blade

The straight but slightly arched cutting edge enables you to remove excess material exactly in line with the contours and to improve surfaces. It's best to store spare blades in the handle.

Easy blade changing

Just remove the cutter cap at the back and push the round opening further to the front. Turn it around once – and the blade has been released.

Space for spare blades

Under the cap also lies concealed an ideal storage place for your spare blades. Cap down, blades in – and always at hand, until needed.

Accessories are things that belong with a tool. In the best sense. Our accessories ensure, for example, that you can store your cutting tool safely. Or dispose of your used blades in an optimal manner.

ACCESSORIES

BELT HOLSTER L WITH CLIP NO. 9922.08

Everything always at hand: BELT HOLSTER L.
What do you do with your cutting tools when you are not actually using them? The MARTOR BELT HOLSTER L is a robust holder that allows you to carry all large MARTOR knives as well as our safety scissors at all times. In addition, the interior and exterior pockets are designed to allow you to load different tools: for example you can carry an extra safety knife, a pen and a pack of blades. The MARTOR BELT HOLSTER is the ideal place to stow your tools safely when moving from A to B – and have them at hand, as soon as they are required.

Certified safety
We always design our cutting tools to the highest standards. So why should our accessories be anything less? Our MARTOR BELT HOLSTERS were therefore tested for harmful substances and stability – and were found to be very good.

Does it fit? Fits perfectly
Our MARTOR BELT HOLSTERS S, M and L are precisely tailored for our knives - and not just that. Depending on the size of the pocket, it allows you to carry a combination of various tools: knife/pen, knife/scissors, knife/knife, knife/pen/scissors etc.

Intelligent spacesaver
With the MARTOR BELT HOLSTER you will always discover new storage options. A compartment here, a slot there – all designed so precisely to ensure the contents are kept as firmly as necessary while offering you maximum flexibility.

2 attachment options
The BELT HOLSTER can be attached to your belt in two ways: by clip-on or velcro fastener. Velcro is recommended for belts; the clip can also be used on many other areas of your clothing, such as your trouser pocket.

Robust material
The BELT HOLSTER is now an integral part of everyday working life. So there is no inconvenience. This is further guaranteed by its durable nylon material, washable at 40°C, which is held together by double seams – even when subject to permanent use.

Suggested equipment:
BELT HOLSTER L
For example for
- SECUPRO 625
- SECUMAX 320
- SECUMAX 363

Suggested equipment:
BELT HOLSTER M
For example for
- SECUMAX 320
- SECUMAX 363

Suggested equipment:
BELT HOLSTER S
For example for
- SECUNORM 500
- SECUMAX 363

HOLSTER LARGE
NO. 9843.08

50% of original size

Application

For our wider cutting tools.
Your cutting tool will feel comfortable in this plastic HOLSTER. Attach it to your belt or with a clip to “utility” pockets, or use it as a knife station at your workplace. The larger HOLSTER in black is suitable, for example, for the SECUPRO MAXISAFE.

PRODUCT DETAILS NO. 9843.08

Size (L x W x H)	109 x 50 x 44 mm
Main material	Plastic
Weight	28.6 g
Weight per unit (loose)	28.6 g

HOLSTER SMALL
NO. 9842.08

50% of original size

Application

For our more slender cutting tools.
This blue plastic HOLSTER is just like the black version, only smaller. Use it to safely store and transport SECUNORM safety knives MULTISAFE, PROFI LIGHT, PROFI40 and the SECUNORM 500. With this HOLSTER on your hip, your knife will always be within grasping range.

PRODUCT DETAILS NO. 9842.08

Size (L x W x H)	104 x 33 x 40 mm
Main material	Plastic
Weight	24.0 g
Weight per unit (loose)	24.0 g

SAFEBOX
NO. 108000.00

50% of original size

Application

Your personal used-blade bank.
The SAFEBOX is large enough to store a large number of used blades safely. And at the same time, it is compact enough to carry with you. The two slits are not only used for filling, but also to “shorten” your snap-off blades. When your SAFEBOX is full, empty it into your USED BLADE CONTAINER.

PRODUCT DETAILS NO. 108000.00

Size (L x W x H)	94 x 18 x 42 mm
Main material	Plastic
Weight	33.6 g
Weight per unit (self-service card)	43.7 g

USED BLADE CONTAINER
NO. 9810.08

25% of original size

Application

For the final disposal of your blades.
You can fill the USED BLADE CONTAINER with the content of your SAFEBOX. Or directly with your used blades. When the box is full, turn the lid until it shuts. Now the box cannot be reopened. The next step is to safely and completely dispose of the filled USED BLADE CONTAINER as normal waste.

PRODUCT DETAILS NO. 9810.08

Size (L x W x H)	107 x 105 x 210 mm
Main material	Plastic
Weight	260.0 g
Weight per unit (loose)	260.0 g

WALL MOUNT BRACKET USED
BLADE CONTAINER
NO. 9845.06

45% of original size

Application

Makes the USED BLADE CONTAINER accessible to all.
Include it in your order now! With this mounting bracket you can fix your USED BLADE CONTAINER to a central location. Use the clamp and screws and nuts supplied with the product to attach it to either a pipe or a rod.

PRODUCT DETAILS NO. 9845.06

Size (L x W x H)	94 x 51 x 94 mm
Main material	Plastic
Weight	123.0 g
Weight per unit (single unit box)	178.0 g

CUTTING MAT
NO. 3001.06

CUTTING MAT with self-healing capabilities. Size 620 x 870 mm.
Do you want to cut without damaging the working surface? No problem. For cutting paper, card, film etc. it is best to use a high-quality MARTOR CUTTING MAT. The mat is made of three layers: a solid core and two resistant outer surfaces. It therefore easily tolerates even high-pressure cutting. The CUTTING MAT always remains smooth and enables you to continue working cleanly. An added aid are the printed grids in cm and inches.

10% of original size

Application

PRODUCT DETAILS NO. 3001.06

Size (L x W x H)	870 x 620 x 3 mm
Main material	Plastic
Weight	2,200.0 g
Weight per unit (polybag)	2,200.0 g

Self-healing
MARTOR cutting mats are equipped with a self-healing surface. They tolerate cuts from the sharpest MARTOR blades and under the highest pressures and look new again after cutting.

Printed grids
Printed grids help you to cut with precision. As an extra, the mat front has a cm-grid and the back an inch-grid. You can choose the grid-size you need.

Large selection
MARTOR cutting mats are available in five different sizes, from very large to very small. Depending on the task and the working environment, you'll always find the format you need at MARTOR.

Self-healing
MARTOR cutting mats are equipped with a self-healing surface. They tolerate cuts from the sharpest MARTOR blades and under the highest pressures and look new again after cutting.

With safety technologies
You can find out how the three MARTOR safety technologies differ by just looking at the small cutting mat. The front is in German and English, the back in French and Spanish.

Large selection
MARTOR cutting mats are available in five different sizes, from very large to very small. Depending on the task and the working environment, you'll always find the format you need at MARTOR.

OUR ADDITIONAL SERVICE MEDIA:
BROCHURES, CATALOGUES ETC.

You can request these and all other service media directly from us – ideally by calling our service number or by visiting our website, where they are available for download.

Safety knives and scissors

In this catalogue we present you our safety knives: high quality cutting tools equipped with reliable safety technologies such as concealed blade, fully automatic blade retraction and automatic blade retraction. Furthermore: our SOS and MDP (= metal detectable) cutters.

Promotional knives brochure

Another MARTOR product family is our promotional knives. They are introduced to you individually in this brochure. No matter whether you work as a distributor for promotional products or whether, as a company or institution, you are looking for the ideal promotional gift for yourself or your target group.

Knife plan

Each MARTOR knife plan is unique. We work with a company's safety officers, plant managers, etc. to create an individual plan which portrays and describes the cutting tools currently in use at your premises. The plan also serves as instructions for users and clearly specifies which MARTOR knife is to be used in which area and for which purpose. This also aids occupational safety and work efficiency.

OUR WEBSITE.
WITH CUSTOMER-ORIENTED SERVICES.

When looking for the best possible product there is nothing like personal assistance, which is one of our strengths. Nevertheless, we would like to satisfy your needs in the best possible way also in other areas – e.g. on our website www.martor.com. Where you can find functionalities, such as the product filter, providing you with an even better overview of our cutting solutions.

Filter all
Which material do you want to cut? And what technical properties should your safety knives have? You can access a selection of suitable products quickly and comfortably through these and many other filter functions. A suitable supplier can be found, for example, via our new distributor search.

Compare all
No doubt there are cutting tools in our product range that are similar. So it's worth it to take a second view. With the functionality to compare products, you can select up to four cutting tools and check them against each other. Discover the product details to find the most suitable cutting tool.
