

SECUMAX 350 SE

ROBUST, SUSTAINABLE, SAFE? ABSOLUTELY!

THE SAFER WAY TO CUT.

martor

SECUMAX 350 SE

NO. 350045

Original size

Robust blade head

The plastic-covered blade head is particularly robust with a blade thickness of 0.5 mm. This SECUMAX 350 SE can therefore take on especially difficult cutting materials in logistics and production.

Concealed blade

The blade head's two cutting edges are safely concealed to protect users and goods and are yet capable of safely cutting 2-ply cardboard boxes and much more.

Spare blade in storage

Blade change is easily and safely executed. Look for the arrow and follow its lead. Open the blue inner side of the knife to reveal the spare blade while also releasing the locking mechanism of the robust blade head.

Ergonomically shaped

Right handed or left handed? It's really all the same. The SECUMAX 350 SE fits perfectly in any hand. Gently arched outer edges, coupled with light ribbing make for an ergonomic experience.

Sustainably designed

MARTOR prioritises sustainability. SECUMAX 350 SE's handle is made of a high-quality recycled plastic. To enable future recycling, it does not use soft-grip components.

More sustainability for cutting tasks?

Try it yourself. With robust blade head.

The SECUMAX 350 SE is our sustainable all-rounder. The black handle is made of 98% recycled plastic. The interchangeable 2-in1 robust blade head also gives the knife an extended service life. It can be used for standard cutting materials as well as for more difficult cuts such as thicker film and strapping band. The concealed blade protects users as well as packaged goods.

PRODUCT FEATURES

Application

Safety technology

Concealed blade – a maximum degree of safety

The SECUMAX 350 SE blade is not an open one, but is hidden from people and goods. This provides you with a maximum degree of safety from cut injuries and from damage to goods.

YOU CAN FEEL THE QUALITY.
