SECUMAX EASYSAFE

THE BLADE IS CONCEALED. THE ADVANTAGES ARE OBVIOUS.

ENJOY SAFETY
MADE IN SOLINGEN

martor

SECUMAX EASYSAFE
NO. 121001

80% of the original size

For people and goods
The concealed blade provides reliable protection to you and your goods. And your company? It benefits it too, since everything goes smoothly.

4-cutting edge blades
Why do you get more out of your blade? Because the blade has four sharp cutting edges. By turning it and turning it around you quadruple the usage time - and always cuts like new again.

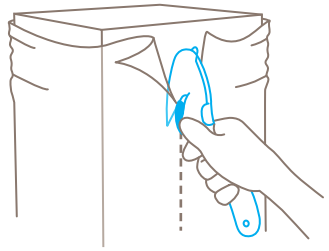
Ergonomic handle
Your cutting tool is permanently being used? Then it's all the more important that handling it is as comfortable as possible causing little fatigue. The ergonomic handle contributes to this.

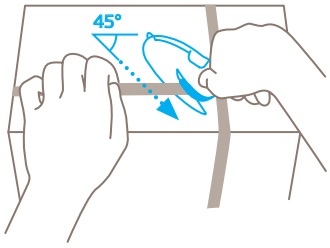
Lockable blade
There is a key for opening and closing that fits into the blade cover. You can only change the blade if you have this key. A must in all conscientious production workshops.

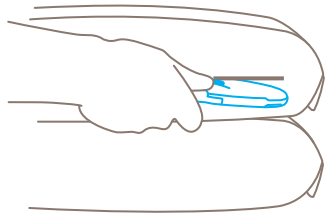
For adhesive tapes
What is the integrated small metal plate at the top of the handle for? Just try it out. Simply place it on the adhesive tape of the cardboard box, pierce it and slit it open in one go. It's that easy.

It's all easy. It's all safe.
The SECUMAX EASYSAFE is multi-talented. The prominent and pointed nose of the cutting tool will easily pierce plastic sacks or foil sealed pallet. And the Solingen concealed blade will cut open the sack or pallet. The integrated plastic spring makes cutting of thin film and paper sheets easier - even in individual layers. And leather, belts or plastic hoops? No problem for the concealed blade.

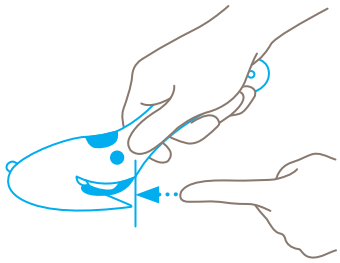
Usage







Safety technology



Concealed blade - the highest degree of safety
The SECUMAX EASYSAFE blade is not an open one, but is hidden from people and goods. This provides you with the highest degree of safety from cut injuries and from damage to goods.
